Nitrogen Tung-ten Lamps Last Word In Humination, Expert Says, Who is Here to Show the Town How to Make Most of Current Consumed

Conne swille is to have a "Great White Way" which will be only a fraction less bright than Broadway, according to F C. Murdock of the National Lighting Products Company, who is in Connellsvale to interest the city and business men in the new nitrogen tungsten lamps for street and interior illumination.

For the purpose of demonstrating the effectiveness of the new 500-watt lamps, some of which are to be used in street lighting under the new city contract, Mr. Murdock's cencern will erret lights along South Pittsburg street from Erimstone Cornec to Edwing max what can be accomplished. The hights will remain in place for a period of one month.

Mr. Murdock is not representing any one particular manufacturer in presenting his proposition, but is interested in having the mirogen tangsten having the mirogen tangster, engineers will at the same time be on the ground to advise merchants as to was they may improve their window and interior lighting systems. Through co-operation with the West Penn, Mr. Murdock's concern is offering to elect these lights at a finderate figure. The fixtures will be of copper, with ornamental scroilwork, making them particularly attractive.

On Pritishurg street the lamps will be presented as the content of the property of the firm of the property of the property of the firm of the property of t

A force of about 15 linemen for the West Penn started work this morning setting poles for the extension of the street lighting system, according to the contract recently entered into with the company by the city council. They will be busy for several weeks setting poles alone. Afterward the stringung of lines will commence. The lights are to be placed at ording to the direction of City Engineer Hirst and Councilman P. Wi Wright. Urder the new plan many places bitherto dark are to be illuminated by the new-style timesten famps of candie-power necessary for the locality.

# WHAT CAUSES COLDS?

This question and "How to Prevent Colds" is asked a thousand times every day. A cold is really a fever, not always caused by the weather but due to a disordered condition of the blood or lack of important foodelements. In changing seasons fatfoods are essential because they dis-tribute heat by enriching the blood and so render the body better able to withstand the varying elements.

This is the underlying reason why the nuclicinal fats in Scott's Emulsion quickly overcome colds and build strength to prevent more serious sickness. It contains nature's medicinal fats, so skillfully prepared that the blood profits from every drop, and it is free from harmful drugs or alcohol. 3-37 Scott & Bowne, Bloomfield, N. J.

# MONEY SAVING TIME Union Supply Attractions

The Union Supply Company stores always have some special bargain sale going on, it is a continuation the whole year round, but just now we are offering something very special in Shoe Bargains Our stocks are heavy, we are overloaded, and to move them out we are reducing prices. The lines are complete in every respect-Men's, Women's and Childien's Footwear. We have for women and misses the very newest styles in Diess Shoes, we have for the elderly women comfortable, low heel broad lasts, complete lines if men's dress and working shoes, the very best knock-about School Shoes for girls and boys that the market produces Now, the reductions are actual, bona fide, it is not catch-trap advertisment, it is a real reduction sale. We are hardly in mid-winter yet, there is going to be much weather that you will need heavy shoes before springtime, and you should take advantage of these reductions. We are not going to specify prices further than to say that many of our shoes are reduced Twenty-Five per cent, other lines as high as Fifty per cent

Investigate yourself-call and see the lines

### KINGALBERT MAKES PROTEST

The State Department is Confronted With a Most Ticklish Problem, Which lived Raises a Question of Recognition of German Sovereignty Over the Cap tured Territory in Delgium.

A difficult and deli ate problem, in A difficult and deli site problem, in volving a very important question of political policy, confronts the American state department as a result of the notification given by Germany thom is Ambassador Germard of Germans a decision to concel the exequations that Belgium accorded to foreign consults.

It is understood that Germany, be lies announcing for decision to cancel the exequences granted by Bellium has also asked for the withdrawal of American and other commiss from cre-tain portions of the taritors occupied by the German military forces in a ginner. This is being done on giound-of military necessity, and no decim-ing the is being shown as between na-tions.

in rion is being shown as between an items. While it is not believed here that to running is at this time socklog to the time socklog to the time socklog to the time socklegate in Belgium the cancellation of all the exequiture comes dangerously not relating it the exequiture comes dangerously not relating it the fact is recognized if not officially all milited at the American state depart ment, and what unless the problem more delicate and difficult for the latted States is the knowledge officially. ed States is the knowledge officiall communicated by M. Havenith the Belgian minister that the Belgian gov ernment has protested most vizorously against Germany & decision to ennect exequaturs

exequature

Basis of Belgian Protest

The Belgian protest is based on the ossertion that the issue and cancellation of an exequatur are acts which imply the sovereignts of the (atterns which they consulte The exequature held by American and other foreign consults in Belgium were grant of by the Bulgian general at hefore ed by the Belgian government before the war. Pelalum points out that Ger-many is only in military occupancy of Beigian territory and that the enjoy-ment of such a de facto possession can not be transformed into a state of soc ereignty in the relations of factoring with neutral states. We contend that may change in the states of the so-celenty of fleightm can only be deter mined by the treaty of purce which will conclude the war

If Germany but proceeded to notify

forcism nations that for reasons of safety on a count of infliters opera-tions or for other stated reasons all consuls should be withdrawn beyond certain military lines no scrious ques-tion would be rulsed if the de facts German military government in Hel-gium on orders from Berlin should grant commissions to foreign consuls to act in certain other cities without consultant their constitute from Recanceling their exequature from Bd partments of this and other neutral nations would not be so delicate and important, because that would not ne-essarily rules the special of recogni-tion of Germany s "sovereignty"

# HAROLD MACGRATH Author of The Carpet From Bagdad, The Place of Honeymoons, etc.

He was not in a happy state of mind. The had taken masters the high moment to avoid meeting again the man had been reckoned among the lost. Many believed him dead, and Craig had wished it rather than be-Bayed. And then, to meet him face to face in that sordld boarding house had shaken the cool nerve of the zambler. He was worried and bowildered. He had practically sent this man to ruin What would be the reprisal? He reached for a mangosteen and ate the white pulpy contents, but without the customary relish. The phrase kept tunning through his head: What would be the reprisal? For men of his lik never struck without expecting to be struck back. Something must be done. Should be seek him and boldly ask what he totended to do? Certainly he could not do much on board here, except to denounce him to the officers hs a professional gambier. And I'aul would scarcely do that since he, Craig, had a better shot in his gun. He could tell who I'm! was and what he had ione. Bodily harra was what he really

He had seen Elsa, but he had worked out that problem easily. She was sure to say nothing so long as he let her be, and with the epicode of the hatpin still tresh in his memory, he ansauredly would keep his distance. He had made a mistake, and was not like-

Mr. Warrington had had his meals served in his cubin, but the steward declared that the gentleman was not ill, only tired and bridge be, and that he amused himself with a trained parrakeet.

All day long the sea lay waveless and unrippied, a ses of brass and laple lamil; brass where the sun struck and laple-lamil; brass the show of the lazy swells. Schools of flying this broke fan-wise in finance of silver, and por poise spected alongside. And warmer and warmer grew the air.

and warmer grew the air.

Starboard was riggod up for cricket, and the ship's officers and some of the passengers played the rame until the first gone. Elsa grumbled to Martin. There was little criough space to walk in as it was willout the men taking the starboard of the ship and over the whole side of the ship and choosing her out of a glorious sinset. Martha grov troubled and perplexed. If there was one phase of characte unknown to her in Elsa it was irritubiland here she was, finding fault like any ordinary tourist.

tonight. All the men were in dritt or ponger, and so receptive is the laugination that the picture relibed the room of half its heat. To and fro the punka flapped; the pulleys creaked and the ropes scraped above the sound of knives and forks and spoons. Elsa ate little besides fruit. She spoke scarcely a word to Martha, and

none to those around her. Thus, she missed the frown of the colonel and the lifted brown of the spinsters, and the curious glances of the tourists. The pussenger list had not yet come from the shap's press, so Elsa's name was practically unknown. But in some unaccountable tanmer it had become known that she had been making inquirles in regard to the gentleman in cabin 78, who had thus far remained to talk plainly to you. If what I say away from the table. Ship life is a is distastoful, don't hesitate to interduil life, and gossip is about the only thing that makes it possible to live through the day. CHAPTER IX.

Two Short Weeks. When Elsa stepped out of the com panionway the next morning she winced and shut her eyes. The whole are of heaven seemed hung with fire opals; east, west, north and south, whichever way she looked, there was dazzing iridescence. What a won derful world! What a versatile mis Martha followed her young mistross into the dining galoon; she was anxious and upset. Where would this mood end? With a glonge of relief she could Warrington's chair still vacant watched the thread of frothing water that chitched fullely at the red water watched to the chitched fullely at the red water watched to the chitched fullely at the red water watched to the chitched fullely at the red water watched to the chitched fullely at the red water watched to the chitched fullely at the red water wate line. Correct garb is necessary to a man's appearance and standing, just as rightful foods are a requisite of good health: but seven-tenths of the clothes offered in stores are unbecoming to the men who wear them. This is because the great majority of makers think only of fashioning something to cover a man's frame.

It's easy to understand why the few good clothes-manufacturers stand out from the crowd when you've noted the superiority of their products.

The best-made, best-designed, best-fitting elothes today are from the establishments of Hirsh Wickwire Co., Society Brand makers, Michaels Stern Co., and one or two others.
